Exceptional sound

- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference
- Full-duplex echo cancellation ensures a smooth conversation
- Freestanding handset with a speaker for easy handsfree calls

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

PHILIPS

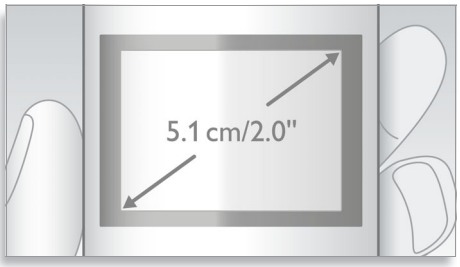
sense and simplicity

Highlights

Full-duplex echo cancellation

Natural conversation does not involve taking turns – there is always some natural overlap. Now thanks to our full-duplex echo cancellation, you can hear perfectly, even if you are both talking at the same time.

5.1cm (2.0") TFT color display



High contrast, 5.1 cm (2.0") TFT color display

Baby monitor

Receive an alert when your baby needs you. Just place the DECT handset in the baby room and receive an alert on your base or on another DECT phone (i.e.. another landline number) or mobile phone (when you're out) when the baby starts to cry.

Eco-conscious model with ECO+

Philips phones are energy efficient and designed to be respectful to the environment. The power consumed by them in stand-by mode is less than 0.75 W. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. Whith ECO+ mode activation the radiation drops to zero.

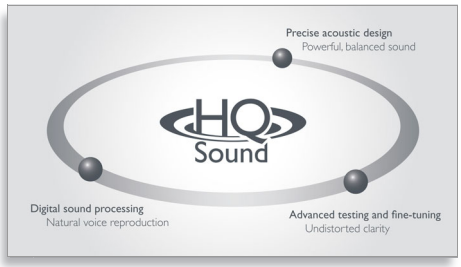
Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Headphone jack & beltclip

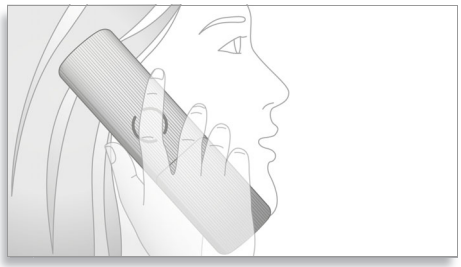
2.5mm headphone jack and beltclip allow comfortable handsfree conversation even if you have to move around the house.

HQ-Sound



Philips cordless phones with HQ-Sound: build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Non-slip grip



The rear of the handset is treated with a special texture for added comfort and better grip.
